

Go Build Georgia High School Teams Business/Industry/Organization Steps to Participation

Dear Business and Industry Leaders,

Thank you for taking the extra step to help build Georgia's workforce today and for generations to come.

Go Build Georgia High School Teams aim to educate students about the wage and lifestyle benefits as well as workplace conditions in the skilled trades of five major career sectors – energy, industrial construction, manufacturing, telecommunications, and transportation. The ultimate goal of each Go Build Georgia High School team is to plug students into the industry workforce pipeline and to provide students with options and information including technical college enrollment; an apprenticeship; career pathway courses at school or community based program. Thus, an integral part of a Go Build Georgia High School Team includes the participation from local business, industry, and organization leaders. Business and industry leaders are invaluable for advisory, speakers forum, career days, tours, job shadowing, and work-based learning opportunities just to name a few.

Linking to an existing team is simple and welcomed.

Step 1 – Go to [\(school link list here\)](#) to see if the school(s) of your interest already have an existing Go Build Georgia High School Team.

Step 2 – Follow the link to complete the ***Business/ Industry Contact Information Sheet*** including name, position, company name, email, phone, and school(s) you are interested in participating with. Please email this completed form to Dr. Karen Curtis. (*Contact Info below*)

Step 3 – If you do not see a school listed that you wish to participate with, please also let Karen Curtis know. Your desire to assist a school will be beneficial to enlisting additional school teams.

Karen Curtis, Ed.D (KC)

Sr. Project Manager, Outreach – GOWD
